Work Experience

Full Stack Developer/ iOS developer, Quiz Arena

2023-12 – present | Edmonton, Alberta

- Co-founded and developed the Quiz Arena app from the ground up, achieving over 1,000 active users per month and over 100,000 games played since its launch.
- Designed and implemented core features such as user profiles, match history, and the "Solo" game mode using React Native and Node.js.
- Led the redesign of the homepage, user interface, and user profiles to improve navigation and user experience.
- Optimized app performance by resolving issues related to image and app loading, ensuring efficient handling of over 90 categories and thousands of images for questions.
- Increased downloads through App Store keyword optimization, contributing to user growth with minimal marketing.

Full Stack Web Developer, Expense Trend

2023-12 – 2024-03 | Calgary, Canada

- Organized backend database architectures and set up APIs for efficient data extraction and integration, ensuring system reliability.
- Translated Figma designs into functional, user-friendly web interfaces using React.js, enhancing user engagement.
- Collaborated with team members using pair programming to share knowledge and improve code quality.
- Managed tasks independently, driving project progress and meeting deadlines.

Manager/ Optician, Bright Vision Optical

2021-12 – 2024-01 | Edmonton, Canada

- Working in a team environment and also work alone to handle and supervise the store
- Work in a managerial position, which included patient follow up, accounting etc.
- Participating in all courses and seminars to improve working
- Responsible for various aspects of the clinic

Full Stack Developer, GamerCoach

2023-06 – 2023-12 | Toronto, Canada

- Redesigned multiple parts of the web application to enhance user interface and experience for both gamers and coaches.
- Implemented multiple page setups using Next.js, ensuring seamless navigation and a responsive layout across devices.
- Developed interactive animations and features to create a more engaging and dynamic user experience.
- Integrated a calendar system for seamless scheduling between gamers and coaches, improving booking efficiency.
- Collaborated on backend development, enhancing functionality and performance.
- Optimized SEO strategies, resulting in increased website visibility and user traffic on Google search results.

Projects

Quiz Arena

2023-12 – present

An interactive quiz platform designed to provide an engaging user experience. Led the complete redesign and functionality implementation for the solo mode, developed a customizable profile page with React components, and optimized the backend system for efficient image rendering, resulting in a 75% decrease in load times. Additionally, reorganized quiz categories, revamped the homepage layout to reduce user overload, and created interactive features such as immediate answer registration and a working leaderboard.
